DETAILED ACTION

Drawings

1. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2882

3. Claims 1-2, 4-5, and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown (U.S. Patent No. 6,317,549) in view of Imoto (U.S. Patent No. 5,742,722).

Brown discloses an optical fiber used in optical transmission systems with an optical amplifier with a doped fiber core and cladding area surrounding the core (abstract). The amplifier has an input (fig. 7, ref. 30-1) and output (fig. 7, ref. 30-2), a mode field diameter of $8.4\text{ }\mu\text{m}$ (col. 5, lines 60-66), and a cut-off wavelength at which the fiber becomes single mode (col. 3, lines 60-64) at a value less than 1450nm (col. 5, lines 60-66). However, Brown fails to specifically disclose the gain fibers.

Imoto discloses the use of a gain fiber with a mode field diameter of $8.8\text{ }\mu\text{m}$ at a wavelength of 1550 nm (col. 7, lines 54-64).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have considered the fiber of Brown to be a gain fiber since gain fibers, according to Applicant, conventionally refer to a design of the fiber. And being that the fiber is designed to meet the limitations of claims subject matter, it can be fully recognized as a gain fiber.

Allowable Subject Matter

4. Claims 3 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2882

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to specifically disclose an optical amplifier with a mode field diameter that is between 10-14 μm .

Response to Arguments

5. Applicant's arguments with respect to claim 1-9 have been considered but are moot in view of the new ground(s) of rejection. Furthermore, Applicant argues that the references lack the teaching of gain fibers. Examiner notes that Applicant neither address nor claims gain fibers anywhere in the claims.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
